critical security methods offers a new approach to research methods in critical security studies it argues that methods are not simply tools to bridge the gap between security theory and security practice rather to practise methods critically means engaging in a more free and experimental interplay between theory methods and practice this recognises that the security practices we research are often methods in their own right as forms of surveillance data mining visualisation and so on and that our own research methods are themselves practices that intervene and interfere in those sites of security and insecurity against the familiar methodological language of rigour detachment and procedural consistency critical security methods reclaims the idea of method as experiment the chapters offer a series of methodological experimentations that assemble concepts theory and empirical cases into new frameworks for critical security research they show how critical engagement and methodological innovation can be practiced as interventions into diverse instances of insecurity and securitisation including airports drug trafficking peasant struggles biometrics and police kettling the book will be a valuable resource for students and researchers in critical security studies politics and international relations

critical security studies establishes a critical perspective for the study of post cold war international relations and examines challenges to international security caused by regional fragmentation and by global economic and cultural change

during the cold war the concept of international security was understood in military terms as the threat or use of force by states the end of east-West hostilities however brought critical perspectives to the fore as scholars sought to explain the emergence of new challenges to international stability such as environmental degradation immigration and terrorism the second edition of this popular and highly respected text offers a wide ranging and comprehensive analysis of the growing field of critical security studies all the chapters have been fully revised and updated to map the on going evolution of debates about international security since 1989 including the more recent shift in emphasis from

critiques of the realist practices of states to those of global liberal governance topics covered include the relationship between security and change identity the production of danger fear and trauma human insecurity and emancipation the book explores the meaning and use of these concepts and their relevance to real life situations ranging from the war on terror to the arab spring migration suffering in war failed states and state building and the changing landscape of the international system with the emergence of a multipolar world and the escalation of global climate change written with verve and clarity and incorporating new seminar activities and questions for class discussion this book will be an invaluable resource for students of international relations and security studies

this book demonstrates that the disciplinary boundaries present within international relations approaches to security studies are redundant when examining social media and inter and multi disciplinary analysis is key a key result of the analysis undertaken is that when examining the social media sphere security scholars need to expect the unexpected this is because social media enables users to subvert contest and create security narratives with symbols and idioms of their choice which can take into account traditional security themes but also unexpected and under explored themes such as narratives from the local context of the users towns and cities and the symbolism of football clubs the book also explores the complex topography of social media when considering constructions of security the highly dynamic topography of social media is neither elite dominated and hierarchical as the copenhagen school conceptualises security speak however neither is it completely flat and egalitarian as suggested by the vernacular security studies non elite approach rather social media's topography is shifting and dynamic with individuals gaining influence in security debates in unpredictable ways in examining social media this book engages with the emancipatory burden of critical security studies this book argues that it remains unfulfilled on social media and rather presents a thin notion of discursive emancipation where social media does provide the ability for previously excluded voices to participate in security debates even if this does not result in their direct emancipation from power hierarchies and structures offline

with in depth coverage of a wide range of issues from terrorism inter state conflict and nuclear deterrence to environmental security health and organized crime contemporary security studies fifth edition is the definitive introduction to security studies bringing together leading scholars it provides a student friendly guide to critical theoretical approaches and the most important issues that dominate the modern security agenda throughout the text students are encouraged to question their own preconceptions and to use their own judgement to critically evaluate key approaches and ideas to help them achieve this each chapter is punctuated with helpful learning features including key ideas think points and case studies which demonstrate the real world applications relevance and implications of the theory the book is supported by online resources designed to help students take their learning further for students explore relevant security issues in greater depth with additional online case studies test your understanding of the key ideas and themes in each chapter with self marking multiple choice questions expand your knowledge of the subject with web links to additional reliable sources for registered lecturers use the adaptable powerpoint slides as the basis for lecture presentations or as hand outs in class
